DETAILED ACTION : *Election/Restriction*

Status of the Claims

Claims 46-65 are currently pending.

Claims 1-45 are canceled.

ELECTION OF SPECIES

1. Claims 46-65 are drawn to a plurality of disclosed patentably distinct species comprising:
(A) species of "support transfer devices" (e.g. claims 52 and 53); AND
(B) species of solid supports according to:
(I) composition (e.g claim 56); and
(II) shape (e.g. claim 57).

The individual Markush Groups above are each composed of distinctly different components; which require different searches (e.g. electronically and manually and bibliographic/classes) thus, it would be unduly burdensome for the Examiner to search all of the above structurally and/or functionally distinct Markush members for all of the presently claimed method embodiments.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for A, B(I) and B(II) above and indicate claims readable thereon, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

Art Unit: 1639

the prior art, the evidence or admission may be used in a rejection under 35

U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
